In addition, an electronic version is required, which should be submitted to our secure mailbox at **rfp@wayne.edu** and be sure your subject line reads **"(company name) RFP Design Services for 2017 Parking Structures 4 and 6 Renovations Response"**. The electronic submission should be limited to no more than one of each of the following file types: 1 PDF document and/or 1 Word Document and/or 1 Excel Workbook, with a total file size less than **20 megabytes**. If your submission was sent correctly, you will receive an auto-reply message acknowledging receipt of your Proposal. II. Project Scope:

Design Services for 2017 Parking Structures 4 and 6 Renovations:

In 2009, Walker Parking Consultants developed a Capital Improvement and Protection Plan for Wayne State University's parking structures #1 through #6. From 2011 through 2015, updated reports were provided and included parking structure #8. These reports provided repair, maintenance, improvements, and phasing recommendations and their associated costs. Through the recommendations of these reports, WSU has repaired parking structures each year. This year, WSU plans to repair parking structures #4 and #6.

Parking Structure #4.

Previous work on structure #4 includes replacing the expansion joints, partial and full-depth concrete repairs, post-tensioning system repairs, beam and column repairs, traffic coating repairs, stair tower steel connection repairs, code-related improvements at stair tower openings, vehicle barrier repairs, among others.

A number of leaking expansion joints remain throughout the structure, which require replacement. These leaking joints have caused corrosion damage to the steel bearing plates, leading to rust build up on the plates, which has lifted the concrete slab on one side of the expansion joint, causing a trip hazard. Repair work completed in 2011 and 2013 addressed about two-thirds of the leaking expansion joints. For 2017, WSU would like to focus on expansion joint replacement, concrete beam deterioration, post-tensioned tendon inspections and repair, and repairing and recoating the existing failed traffic coating. Also included are other structural deterioration conditions and waterproofing repairs that will help protect and preserve the structure.

Parking Structure #6

In 2011, repairs addressed the majority of the deterioration conditions that were present at that time. Additional concrete wash deterioration, however, continues to develop. Work for 2017 includes repairs to the concrete structure, waterproofing over ledger beams and along interior walls, exterior sealants, drainage, as well as structural maintenance to the waterproofing, which will include traffic coating throughout, exterior sealants, and crack / joint sealant repair.

Steps taken to negotiate amendments that are not in the proposals may result in the University choosing to contract with another candidate partner.

Responses to the RFP must include a completed Schedule C – Level of Effort Table.
