**Addendum #1 To
Request for Proposal
For Parking Structure #3 & #5 Technology Enhancements: Project 045-229072**

**Minutes of the Pre-bid Conference
Dated April 29, 2013**

The Addendum must be acknowledged on your lump sum bid.

The pre-bid conference for Request for Proposal for **Parking Structure #3 & #5 Technology Enhancements**, Project **045-229072** was held on **May 6, 2013**, at **2:00 pm** (local time) – at Detroit, MI 48202. **Valerie Kreher** reviewed the highlights of the pre-bid package, especially concerning details such as bid due dates and who vendors may contact during the live bid process. **William McVea** and **Matt Burchart** from **Sports View Technologies (SVT)** discussed the technical aspects of the project and bid requirements, and conducted the Q & A session.

NOTE: You must have attended a prebid conference in order to be eligible to bid on a particular project. Receipt of minutes or addenda without being at a prebid conference does not qualify your company to bid.

Numerous simple questions and answers were addressed at the pre-bid meeting. Some of the issues were as follows:

- A bid bond is not required for bids below \$50,000. Otherwise, a bid bond (5%) will be required for the full amount of the bid.
- Performance Bond and Material & Labor Payment Bond requirements are listed in the specifications of the job. Performance & Material & Labor Payment Bonds must be provided by the awarded Vendor with the submission of the signed contract; which will then be submitted to FP&M management for counter signature.
- The awarded vendor must provide the required Certificate of Insurance in compliance with Section 800, article 11 of the bid specifications prior to commencement of any work.
- If your company has not previously done business with the University you may go to the Purchasing website at **www.purchasing.wayne.edu** and look for the “new vendor” link under “Information for Vendors” on the left. You may submit a new vendor request form and an IRS form W-9. This will register your company on our vendor list. (NOTE: this does not replace the listserv.)
- This Project Requires Vendors to use Union Labor, either their own or as labor supplied under a Project Labor Agreement. Section 00420 of the Bid Documents outlines the University’s Project Labor Requirements for this and all projects that requiring prior approval of the Board of Governors.
- 1099 workers and subcontractors using 1099 workers are NOT acceptable
- Certified Payroll must be provided with each of the contractor’s pay applications for all workers who worked at the job site, in compliance with the State of Michigan policy. Failure to provide certified payroll will constitute breach of contract, and pay applications will be returned unpaid and remain so until satisfactory supporting documents are provided.
- Signed waivers from all Subcontractors and suppliers must accompany Pay Applications or they will be returned for such documentation prior to approval.
- A properly executed sworn statement is required from all tiers of contractors, and sub-contractors indicating sub-contractors and suppliers which provide services or product of \$1,000.00 or greater. Sworn statements must accompany applications for payment

- All documents listed in the Front End Section 00420-2 "Wayne State Project Labor Agreements" must accompany applications for payment. Failure to do so will result in the entire application package returned for correction.
- A checklist of all Pay Application requirements can be found in Section 00430-1.
- The competency and responsibility of Bidders will be considered in making the award. The Owner does not obligate himself to accept the lowest or any other bids. The Owner reserves the right to reject any and all bids and to waive any informalities in the Proposals
- Parking on WSU campus lots and structures are **\$6.00/access**. Vendor must build parking into their lump sum bid. However, for this bid, the parking fee will be waived.
- Structure Three is a brand new install, Structure Five has an existing camera system that must be demolished and disposed of, conduit can be reused and the bank of monitors will need to be disposed of also.
- The maximum allowable length of the cabling runs is approximately 280 feet. For runs longer than the allowable 280 feet, a mid-span or high-span POE injector will be provided by the contractor and installed in a weatherproofed enclosure.
- In order for the job to be complete, WSU must be provided with a spreadsheet or other documentation listing all cameras, IP addresses, locations, a snapshot of each camera, and other pertinent information
- The Nice camera channel license must be provided by the vendor awarded contractor.
- The standard price for the Nice license and programming per camera will be \$470.00 per channel. This does not include any programming at the camera. (IP addressing, password, Motion, approved firmware, aiming and focusing and lighting configuration is the responsibility of awarded contractor.) SVT will program the camera in the NICE system for WSU.
- A list of Nice approved cameras and firmwares is attached to this addendum for reference.
- Vendors do not need to contact SVT for pricing or other information as it is provided here, as it was stated in the prebid and below on this form, do not contact anybody except the buyer in Purchasing, Valerie Kreher at rfpteam2@wayne.edu
- Be sure to follow the communication standards listed in the specifications. The link is in the specification document
- All switches and servers to be provided by WSU, the conduit to be provided by the vendor
- All cameras exposed to the exterior must have lighting surge protection for Cat 6 and be POE capable prior to being punched down into the patch panel and they must be tied into an earth ground.
- There is reduced traffic in the parking structures during the summer months, however, there will still be traffic, both student and professional.
- All cameras on Parking Structure #5 roof to be 10' above finished grade of garage. This includes the square poles on exterior of roof.
- Cameras 504-23 and 504-24 can be mounted to same pole that 504-22 is located at on the roof level of Parking Structure #5. (Sheet AV-A504 is re-released as part of this addendum to capture this change.)
- Contractor to provide WSU with "snapshot of image" prior sign off. This is to alleviate the need to revisit camera as some are difficult to reach.
- The voltages in the lights at the roof level of Parking Structure #3 is 208v.
- Vendors can choose to do one parking structure at a time or put two crews to work in both at the same time
- The University's substantial completion date is predicated on the beginning of the school year. Failure to meet the substantial completion date will be taken very seriously
- Section 300, Form of Proposal has changed very recently, review carefully and complete in its entirety to avoid disqualification.
- The contractors **must** fill out our prequalification form. They can attach additional information if they would like but at a minimum the information requested must be filled in on our form so that we do not have to hunt to find the information
- Contractors who have withdrawn a bid after a University bid opening and/or refused to enter into a contract with the University upon notification of award within the last 3 years are not eligible to bid on this project
- Project hours of operation are 7:00am – 5:00 pm. Anything else requires advance notice and approval.
- Prequalification meeting will be held the first business day after bid openings. Contractors must be available. The Project Manager will coordinate the meetings.
- Prequalification meeting includes Schedule of Values from the Contractor, including a list of Contractor's subcontractors and other qualifications required by the documents.
- An unsigned contract will be given to the successful Contractor at the conclusion of the Prequalification meeting, if all aspects of the bid are in order. The Contractor has 5 business days to return the contract to the Project Manager for University counter signature. The contractor must also submit a Performance

Bond as outlined above and a Certificate of Insurance in the same 5 business day period. In the event the Contractor fails to return the documents in this 5 day period, the University reserves the right to award the contract to the next most responsive bidder.

- An Optional second walk thru was not scheduled. .
- Permit requirements are the responsibility of the awarded contractor as listed on Section 800 Article 4.
- Vendor must provide their own dumpster if needed, which must be rubber or plywood padded if placed on concrete. Location and duration must be coordinated with the project manager. Dumpster must be tagged with the name of your company clearly displayed. Any lawn damage must be restored.
- Questions are due by **May 9, 2013** at 12:00 noon
- Bids are due no later than 2:00 p.m., **May 15, 2013**, at 5700 Cass Ave. Room 4200 AAB.
No public bid opening will be held.
- **Time of Completion:** The Contract is expected to be fully executed on or about 15 calendar days after successful bidder qualification and recommendation of award. The successful bidder (Contractor) agrees to start construction **immediately after** receipt of a fully executed contract and Purchase Order, and to complete the work as follows: Substantial Completion, and State Approved Inspections (if appropriate), no later than **August 2, 2013**.
- A copy of the sign in sheet is available for downloading from the University Purchasing Web Site at **http://www.forms.purchasing.wayne.edu/Adv_bid/Adv_bid.html**.
- This is an occupied area, awarded vendor must be considerate of environment (noise, cleanliness, etc)
- **IMPORTANT- This is an addendum which MUST be acknowledged on your bid form**

We will require two copies each of your lump sum proposals, vendor qualification questionnaire and your bid bond documents.

All questions concerning this project must be emailed to: **Valerie Kreher**, Purchasing Department. Email: **rfpteam2@wayne.edu**, copy **Robert Kuhn, Senior Buyer**.

Again, do not contact either FP&M or the Design Firm directly as this may result in disqualification of your proposal.

Thank you for interest shown in working with Wayne State University.

Valerie Kreher
Senior Buyer

CC: **William McVea** (Project Manager), **Robert Kuhn, Senior Buyer**, Attendee list.

Application Note

NiceVision IP Devices Full List

Document Identification	
Product Name:	NiceVision IP Devices – plug-in package
