SECOND FLOOR ELECTRICAL DEMOLITION PLAN

GENERAL DEMOLITION NOTES:

1. The floor plan of this area is not always clear due to the nature of the demolition work.

2. Do not use any tools to remove the existing electrical fixtures and connections.

3. All existing electrical connections must be removed before beginning any demolition work.

4. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

5. All existing electrical connections must be removed before beginning any demolition work.

6. Before the start of any demolition work, all existing electrical equipment must be disconnected from the power source.

7. All existing electrical connections must be removed before beginning any demolition work.

8. The existing electrical system must be inspected before beginning any demolition work.

DESTRUCTION OF EXISTING ELECTRICAL EQUIPMENT:

1. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

2. All existing electrical connections must be removed before beginning any demolition work.

3. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

4. All existing electrical connections must be removed before beginning any demolition work.

5. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

6. All existing electrical connections must be removed before beginning any demolition work.

7. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

8. All existing electrical connections must be removed before beginning any demolition work.

9. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

10. All existing electrical connections must be removed before beginning any demolition work.

11. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

12. All existing electrical connections must be removed before beginning any demolition work.

13. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

14. All existing electrical connections must be removed before beginning any demolition work.

15. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

16. All existing electrical connections must be removed before beginning any demolition work.

17. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

18. All existing electrical connections must be removed before beginning any demolition work.

19. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

20. All existing electrical connections must be removed before beginning any demolition work.

21. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

22. All existing electrical connections must be removed before beginning any demolition work.

23. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

24. All existing electrical connections must be removed before beginning any demolition work.

25. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

26. All existing electrical connections must be removed before beginning any demolition work.

27. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

28. All existing electrical connections must be removed before beginning any demolition work.

29. All existing electrical equipment must be disconnected from the power source before beginning any demolition work.

30. All existing electrical connections must be removed before beginning any demolition work.
## General Notes

1. These drawings represent the views, sections, and arrangements of structural, architectural, electrical, mechanical and plumbing systems. They do not, however, cover the complete specification of the same. These drawings are added to drawings and specifications included in the contract documents. Additional information will be furnished to the contractor by the architect.

2. These drawings are to be read in conjunction with the contract documents and specifications included in the contract documents.

3. Specifications and notes specified above are subject to change at the discretion of the architect.

4. Drawings and specifications will be held as designed for the project support of all systems.

5. Sheet number and title shall be filled in as required in accordance with proper sequence.

6. The sheet number shall be filled in as indicated.

7. The scale on the sheet shall be filled in as indicated.

8. The date on the sheet shall be filled in as indicated.

9. The scale on the sheet shall be filled in as indicated.

10. The date on the sheet shall be filled in as indicated.

11. The scale on the sheet shall be filled in as indicated.

12. The date on the sheet shall be filled in as indicated.

13. The scale on the sheet shall be filled in as indicated.

14. The date on the sheet shall be filled in as indicated.

15. The scale on the sheet shall be filled in as indicated.

16. The date on the sheet shall be filled in as indicated.

## Construction Key Notes

1. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

2. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

3. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

4. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

5. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

6. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

7. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

8. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

9. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

10. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

11. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

12. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

13. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

14. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

15. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.

16. All work shall be performed in accordance with the latest edition of the American National Standards Institute (ANSI) and the American Society of Heating, Refrigerating and Air-conditioning Engineers (ASHRAE) and the standards and codes specified in the contract documents.
